

Project Management Process Steps

	PHASE A First Enquiry	PHASE B Feasibility	PHASE C Selection	PHASE D Detailed design engineering	PHASE E Production	PHASE F Project evaluation and finalization
Step1	Information gathering: window dimensions - space requirement - way of mounting - voltage - washing system - control unit	Draft design	Selection choice	Drawings and specification	Finalization of drawings and specification	Project analysis with customer
Step2	Term and Conditions	Quotation	Contract agreement draft	Design freeze	Schedule of production	actions
Step3	General requirements	Contract discussion and finalization	Contract execution	Prototype production	First product inspection	Project review
Step4	Technical Requirements	Production Research	Order confirmation	Test Procedure determination	Production execution	
Step5	Clause by clause document analyse				Final product inspection
