

Clear view wiper system

For really rough conditions

Clear view screen

If you need to be able to head out in any kind of weather, you can end up in conditions where traditional wipers will not be able to give you a clear view. For these circumstances, we now offer you a SeaView Clear View Screen (CVS).

The system

The CVS is a completely different kind of wiper than all others. It consists of a seawater resistant aluminium rim that holds the glass pane. The CVS system is built into the windscreen. The pane functions via it's front part rotating at high speed, which disperses the rain to the side. It leaves a clear view within the rim. The CVS comes complete with a detailed installation manual, a cutting template and a mounting tool. A control panel (bulkhead or flush mounted) can be ordered seperately.

Additions

Depending on the conditions you are likely to meet, we can supply the largest CVS (the 350-model) with a heavier motor. We can also supply heaters, which will prevent the pane from fogging up. It also will prevent the mechanism from freezing together in very low temperatures (below freezing).

Lloyd's approved

The CVS is used in very demanding situations, which means the system must comply to the highest standards. Having Lloyds Register of Shipping approval proves the CVS is up for its job.

Technical specs	Type 300	Type 350
Diameter of pane	343 mm	393 mm
Viewing diameter	300 mm	350 mm
Internal depth	60 mm	60 mm
Glass thickness*	6-19 mm	6-19 mm
Weight	5.5 kg	6.5 kg
Voltage	12&24vDC or 110&220vAC/DC	12&24vDC or 110&220vAC/DC
RPM	1600-1800	1400-1600
Motor Power	60W	60W
Heating element (not included as a standard)	110W	130W

* When ordering a CVS, please state the thickness of glass in which the CVS is to be mounted.
