

## KW Wiper blades SS 316

These Exalto Wiper blades are manufactured of stainless steel 316. To prevent reflection, a black coating is applied on all metal parts. The Heavy Duty (HD) blades have a special profile that reduces lift. This makes them perfect for applications where a little more pressure is required. The HD blades are also more screen friendly due to the use of plastic lower bridges. In case of damaged rubber, these plastic bridges will not damage the screen. Keep in mind that every motor has a maximum blade length when choosing your wiper blade.

Pos	Description	Blade length	Item no.
1	Exalto Wiper blade	250 mm	2170.HP
1	Exalto Wiper blade	300 mm	2171.HP
